What is Community Charging Suite?

Community Charging Suite is RIOD's free software platform that enables any POWERPOD Go or City charger owner to share their charger with other EV users and earn revenue. The platform handles billing, payments, user management, and charger discovery automatically.

The platform is completely free to use. RIOD charges a 10% service fee on in-app transactions only. There are no subscription fees, no setup fees, and no minimum commitments.

How It Works

1. Install any POWERPOD Go or City charger with Wi-Fi or 4G connectivity
2. Register your charger on the Community Charging Suite app
3. Set your own charging tariff (per kWh or per session)
4. Your charger appears on the app's map for nearby EV owners
5. Users scan the QR code or use the app to start a charging session
6. Payment is processed in-app and credited to your wallet
7. RIOD deducts a 10% service fee on each in-app transaction

Key Features

- Free to use - no subscription or setup fees
- Set your own tariff - full control over pricing
- In-app payments - automatic billing and settlement
- Charger discovery - your charger visible to all app users
- Usage tracking - detailed session history and earnings reports
- User management - control who can access your charger via RFID
- QR code charging - users scan and charge without registration
- Wallet system - add funds, track balance, auto-settlement

Who Is It For?

- Apartment societies sharing chargers among residents
- Homeowners earning from their private charger during idle hours
- Small businesses (cafes, restaurants, shops) offering EV charging as an amenity
- Parking lot operators adding EV charging as a value-add
- Any charger owner who wants to monetise idle charging capacity

Pricing

Community Charging Suite is free. There are no subscription fees, no setup costs, and no hardware lock-in beyond requiring a POWERPOD Go or City charger with connectivity.

Fee Structure	
Platform Fee	Free
